

RHO

Part Of The Armonia Collection

PRODUCT DESCRIPTION

Rho's wear layer is constructed from 4mm solid European White Oak Hardwood and its core is comprised of layers of plywood. Chevron flooring is one of the most sought after hardwood choices in the US. All of these layers combined result in a 5/8" total plank thickness and each plank measuring 4-3/4" in width.

With flooring manufactured by ADM, you can set up the ageless look of European White Oak engineered hardwood flooring by implementing your own design expertise to the color and finish. ADM Flooring collections provide customers with a product perfectly made for their home and budget. Rho guarantees an economical choice within our Rustic grade. We assure you that it will give a modern feel to your current or upcoming renovation with its classic Grey European White Oak color and style combination.

Each box of Rho contains 11.25 square feet of engineered hardwood. It has Wire Brushed surface texture and the planks are 28-7/8" long. Our flooring is constructed from layers of plywood, topped with a solid European White Oak veneer.

PLEASE NOTE: True color may vary based on your monitor settings.
